DETAILED ACTION

*Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 19, drawn to a peptide which possesses inhibitory activity against human leukocyte elastase, classified in class 530, subclass 324+.
- II. Claims 8-13 and 15-18, drawn to a DNA sequence encoding a polypeptide, classified in class 536, subclass 23.5.
- III. Claim 14, drawn to an antibody, classified in class 530, subclass 387.1.
- IV. Claim 20, drawn to a method of treatment, classified in class 514, subclass 12.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be chemically synthesized.

4. Inventions I and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be

Art Unit: 1645

shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the protein can be used in a method of purification of antibodies or in a method of making antibodies or to inhibit elastase *in vitro*.

5. Inventions I and III are related as polypeptide and antibody. The polypeptide of Group I can be used in the methods of Groups IV rather than to make or isolate the antibody of Group III. Inventions I and IV are related as nucleic acid and a method using the protein. The nucleic acid is not used in any of the methods. Inventions II and III are related as nucleic acid and antibodies. The nucleic acids are not used to make the antibodies. The inventions of each named pair can be shown to be distinct because they do not rely upon each other for their ultimate use, are chemically and functionally distinct, and they require non-coextensive literature searches.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, as shown by their different classification, and require non-coextensive literature searches, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1645

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

9. Any inquiry of a general nature or relating to the status of this general application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Papers relating to this application may be submitted to Technology Center 1600, Group 1640 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Should applicant wish to FAX a response, the current FAX number for Group 1600 is (703) 308-4242.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia A. Duffy, Ph.D. whose telephone number is (703) 305-7555. The examiner can normally be reached on Tuesday-Saturday from 10:00 AM to 6:30 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynette Smith, can be reached at (703) 308-3909.
